ACTIVELY MANAGED CERTIFICATE CRI-PTONITE: NEXT GEMS

INVESTMENT OBJECTIVE

The investment objective of the Next Gems Certificate is to achieve long- term capital growth by accumulating high potential growth tokens and at the same time following swing trades strategy on major pair of crypto assets. The swing trades strategy is based on a proprietary method combining revised Elliott wave Theory and identification of cycles in different time frames. Execution will ensure to enter the market at the best possible price within identified trend against an invalidation level. Strict risk management will validate targets identified during the trade setup process to maximize gain and exit market at the best price within their identified structures.

**The returns of 2018, 2019 represents the performance achieved on different segregated accounts, net of fees. The 2020 performance from January to August represents the performance of our Pilote certificate, net of fees. From September 2020, the performance represents the actual monthly return of the certificate, net of fees.

*** On august 30th we corrected an error in the performance calculation of the YTD performance only. Both the chain performance shown on the graph and the monthly performance were accurate, only the compound of the YTD was inaccurate.

Past Performance disclaimer: Past performance does not guarantee future results. No guarantee is given by the Actively Managed Certificate, the strategy Manager that the investment objective of the Certificate will be achieved. The investment return and principal value of an investment will fluctuate so that an investor's units, when redeemed, may be worth more or less than their original cost. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units.

Following the fall during June 2022, we now consider that the current correction from April 2021 high is addressing the cycle from inception of Bitcoin. So, from Bitcoin from inception has risen in a 3 waves pattern to 14/04/2021 high at 64,854.00 before starting correcting in a complex structure that we now propose as a FLAT. The first leg of this correction went down to 20/07/2021 29,278.00 low before bouncing and trapping bulls with an overshoot all time high at 10/11/2021 69,000 high before dropping to 17,622.00 low dated 18/06/2022. The structure of this leg to the downside is a regular double correction that we propose ending on 13/06/2022 at 17,622.00 low. Since then, the bounce is corrective in nature and as we could not rule out a marginal new low last month, our view is now that structures in smaller time frames are calling for this new low. As the overall structure of the cycle from April 2021 remains unchanged even with this new low, we prefer to stay on the side line here and wait for a confirmation that the uptrend is resuming from here or lower.
