ACTIVELY MANAGED CERTIFICATE CRIPTONITE NEXT GEMS

INVESTMENT OBJECTIVE

The investment objective of the Next Gems Certificate is to achieve long-term capital growth by accumulating high potential growth tokens and at the same time following swing trades strategy on major pair of crypto assets. The swing trades strategy is based on a proprietary method combining revised Elliott wave Theory and identification of cycles in different time frames. Execution will ensure to enter the market at the best possible price within identified trend against an invalidation level. Strict risk management will validate targets identified during the trade setup process to maximize gain and exit market at the best price within their identified structures.

**The returns of 2018, 2019 represents the performance achieved on different segregated accounts, net of fees. The 2020 performance from January to August represents the performance of our Pilote certificate, net of fees. From September 2020, the performance represents the actual monthly return of the certificate, net of fees.

Past Performance disclaimer: Past performance does not guarantee future results. No guarantee is given by the Actively Managed Certificate, the strategy Manager that the investment objective of the Certificate will be achieved. The investment return and principal value of an investment will fluctuate so that an investor's units, when redeemed, may be worth more or less than their original cost. The performance data does not take into account the commissions and costs incurred on the issue and redemption of units.

In March the crypto landscape continued to evolve amidst some changes in market conditions.

Our investment strategy has slightly evolved, with a focus on Layer 1 projects. This shift reflects our adaptability to emerging market trends and our commitment to capitalize on promising opportunities in these sectors.

We observed a notable reaction following the pullback at the beginning of March. However, the lack of sustained price momentum signals a subtle change in market dynamics. This warrants a cautious approach as we navigate potential short-term fluctuations.

Cautious short-term outlook, we anticipate a possible pullback towards the low \$60Ks to mid \$50Ks in the short term. This forecast is influenced by several factors, including the rate cuts anticipation, the CPI data, the upcoming halving event and the expectation of a slower spring season. Despite this short-term caution, our long-term bullish sentiment for the remainder of 2024 remains intact.

Our core swing positions currently revolve around Solana (Sol), Bitcoin (Btc), Ethereum (Eth). These assets are strategically selected based on their strong fundamentals and potential for sustained growth in the coming months.

Investments where we aim to capitalize on significant pullbacks include Solana (Sol), Ethena (Ena), BeamX (BeamX), Fantom (FTM), and Near Protocol (Near). These tokens present compelling opportunities for entry at favorable price points.

Amidst our strategic shifts, it's important to note ongoing changes in the broader crypto landscape compared to previous cycles. Attention is much more diluted with much more projects to focus on. Therefore, we believe in a "barbell" approach with, on one side quality projects and, on the other side "gaming" coins and AI. We will remain aware of the everchanging landscape in the industry.
